

MAIN MENU

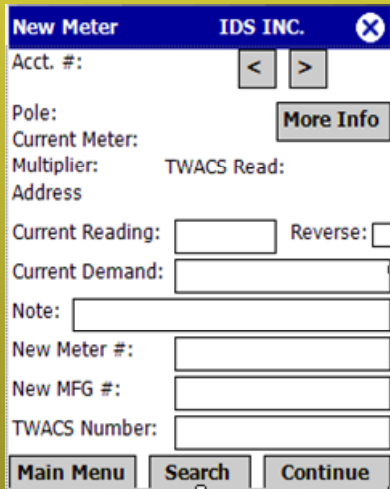

Automated Collection of Meter information done in the field

METERTrak is an automated way to collect information about meters in the field by field service representatives. Whether you are replacing the meter or procession service information about the member location, METERTrak collects it all using the latest automated technology

By capturing the information using the Barcode Scanner or inputting the information with the built in Qwerty Keyboard, information is gathered efficiently and accurately at the point of activity.

METER REPLACE

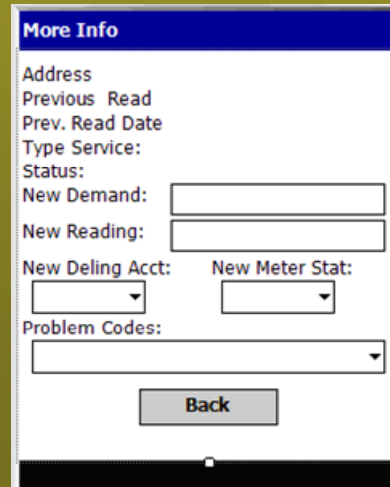

Stored in the memory of the hand-held terminal and synced back to the host computer eliminates errors and saves time

- Barcode Scanning Technology
- Microsoft Windows MOBILE 5.0 OS
- Rugged for field service applications
- GPS Capability
- Interfaces with SEDC system Real Time through Wi-Fi Wireless Technology

A Visionary Leader in Mobile Wireless Voice and Data

ADDITIONAL INFORMATION

Symbol Technologies is the global leader in developing and deploying mobile voice and data solutions. They were the first to create a switch-based wireless LAN infrastructure; to develop true application-specific mobile wireless devices and to market converged voice and data technologies.

GPS Functionality with

LinksPoint manufactures the GlobalPoint GPS™ line of specialized GPS receivers for mobile computing devices and rugged handheld computers. LinksPoint include "snap-on," serial, and Bluetooth GPS receivers and data loggers
